Berenice Abbott

By Connor Rowland

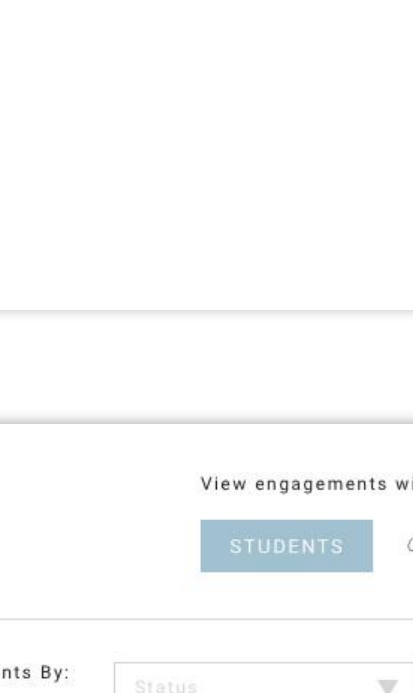

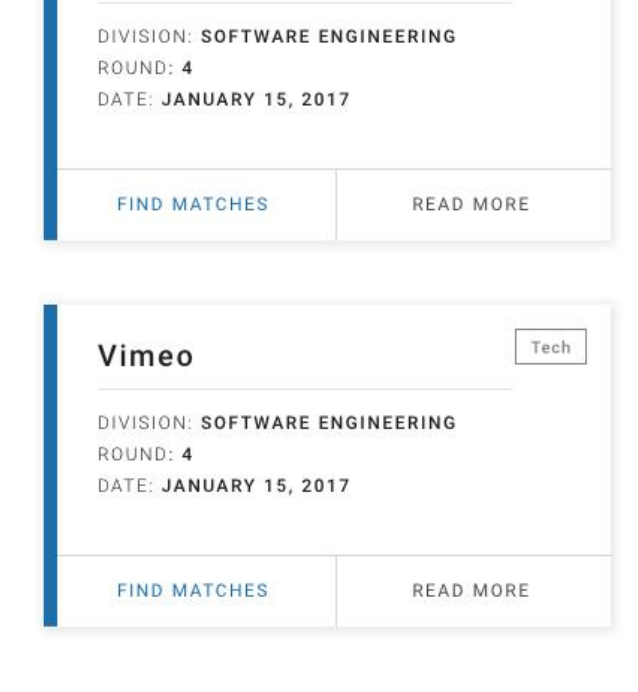

Biography

Born July 17, 1898 in Springfield, Ohio, Berenice Abbott spent her life as an artist using photography as a medium. Her most notable work is a project titled *Changing New York*. Berenice Abbott documented New York City through a government funded program that aimed to employ artists during the Depression-era. "Struck by its rapid modernization," Abbott photographed a wide array of New York's architecture in black and white (Britannica.com).

Political Significance

Abbott's work highlights a time in American history defined by unsteady and rapid change in a city where those attitudes were intensified. Some of Abbott's photos depict shoddily made huts that people were subject to live in, as a result of the circumstances surrounding the great depression.
